SERVINGS

INGREDIENTS

- 1 lb elbow macaroni (dry)
- 1 lb ground beef
- 1 tbsp avocado oil
- 1 cup chopped onions
- 1 cup shredded lettuce
- ½ cup chopped pickles
- 2 tbsp steak seasoning (such as Montreal Steak Seasoning)
- 8 oz block cheddar cheese
- 3 tbsp flour
- 2 tbsp butter
- 3 cups milk

METHOD

- 1 Cook pasta in salted water until al dente. Drain and set aside.
- 2 In a large pan, heat avocado oil. Brown the ground beef with steak seasoning.
- 3 In a separate saucepan, melt butter. Whisk in flour to form a roux. Slowly add milk, stirring until smooth. Add shredded cheddar and stir until melted.
- 4 Combine pasta, beef mixture, and cheese sauce. Top with onions, lettuce, and pickles. Mix well and serve.

BEST TIME TO EAT

- ✓ Post-practice dinner — the protein and carbohydrate combination is ideal for muscle repair and glycogen restoration
- ✓ Post-competition recovery — especially after tournament days where multiple matches have depleted energy stores
- ✓ Night before a competition if eaten 3–4 hours before bed — the carbohydrates load glycogen overnight for the next day's performance
- ✗ Not within 2–3 hours before competition — the fat content in ground beef slows digestion and can cause heaviness or GI discomfort during intense activity
